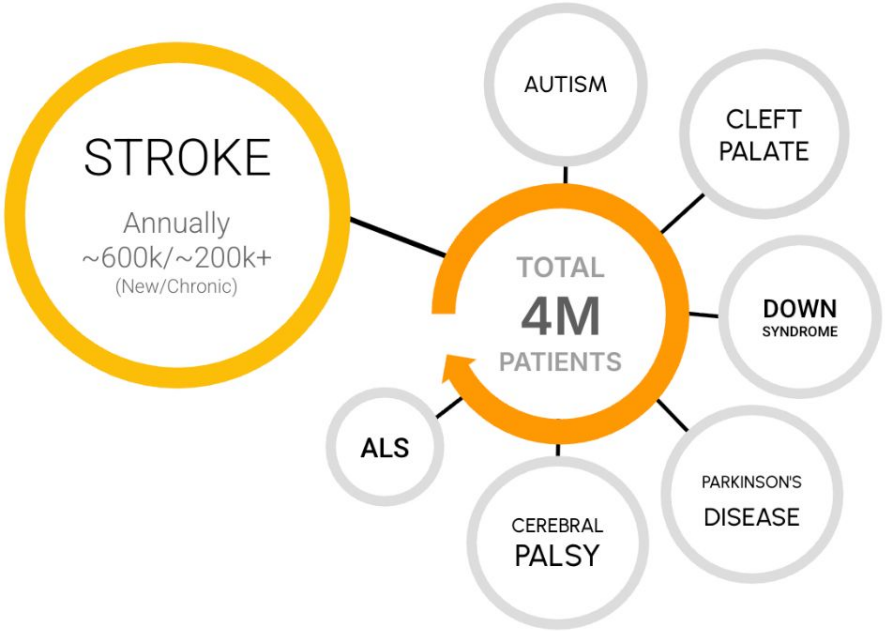
CCC SLP, Consultant
Home Care, OSF Healthcare

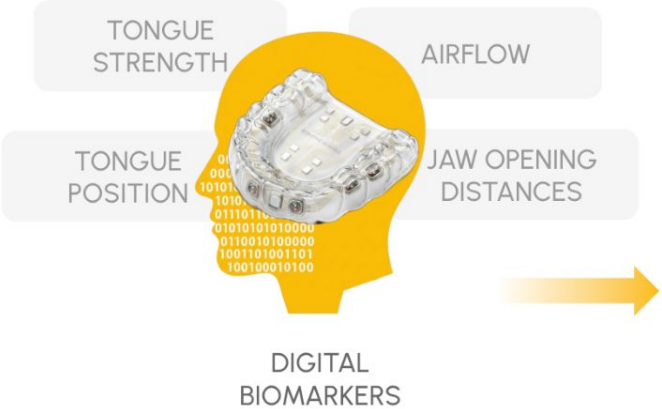
No objective measurement in speech therapy.

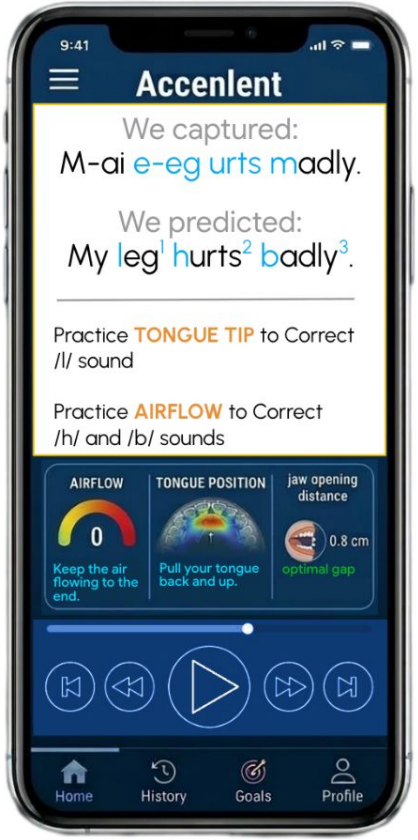
62% of stroke patients receive no speech therapy during their critical first year following discharge[1].



Source: Stroke. 2023;54(3):831-839.

Accenlent's proprietary **Digital Precision AI Platform** brings Continuous and Remote Monitoring to Speech Therapy



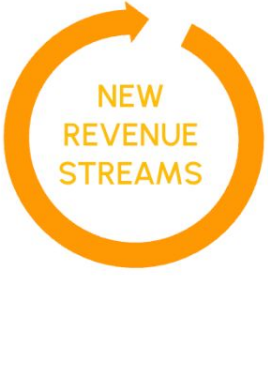


ACCENLENT

Scale patient capacity and profitability **WITHOUT** increasing in-person visits.

1. AFTER IN-CLINICS THERAPY, SETUP DEVICE

2. REAL TIME SUPPORT & CONTINUOUS GUIDANCE



3. SPEECH THERAPIST'S MONITOR DASHBOARD & REMOTE COUNSELING

4. WITH ONE CLICK, FILE MORE SUCCESSFUL INSURANCE CLAIMS BY ATTACHING PROGRESS REPORTS

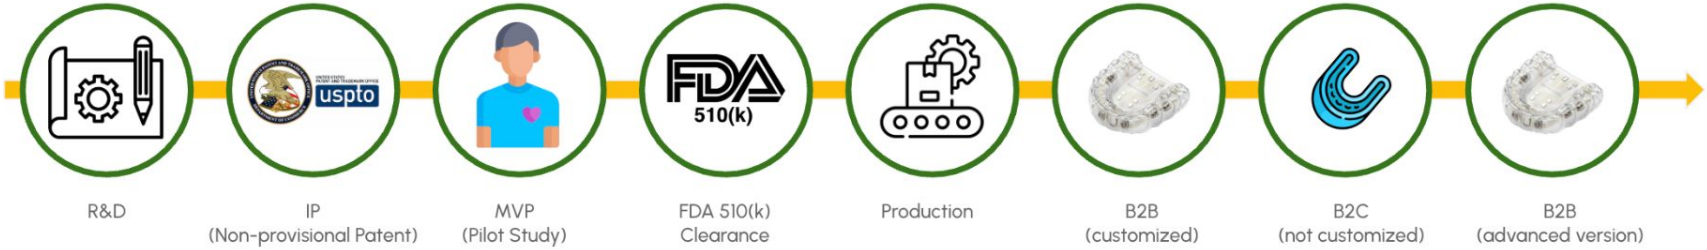
CUSTOMER DISCOVERY

We talked to **50+** speech therapists, and we conclude:

1. AI Empowers, Not Replaces

2. Remote Monitoring Drives Compliance & Engagement

COMMERCIALIZATION PLAN

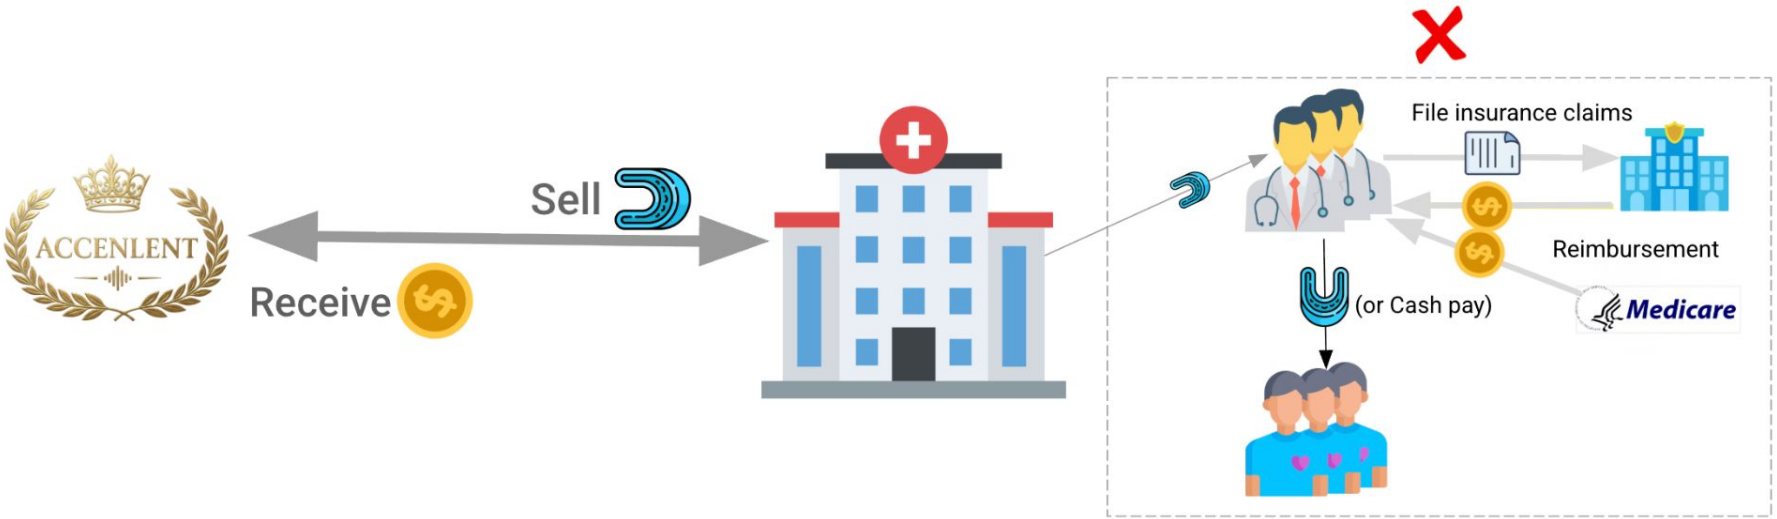


Do we require FDA clearance?

Yes, there are previous predicate devices that would allow 510(k) pathway.

B2B2C REVENUE MODEL

Target is selling to providers via distributors, bypassing insurance delays.



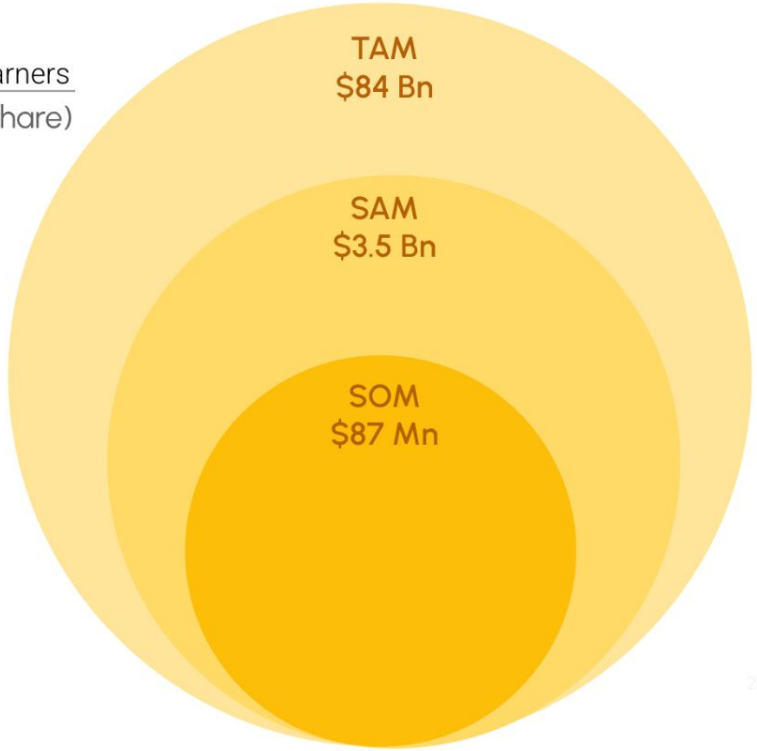
MARKET SIZE

B2C: Without prescription, NOT customized mouth guard, 134 Mn language learners

(Est: 15 % market share)

B2B: Prescription required, Customized mouth guard, 4 Mn patients

B2B: Wholesale price: $450(+$35 SaaS/mo), retail price: $750, 100k patients



COMPETITIVE ADVANTAGE

	Accenlent	Traditional Therapy (Mirrors/Observation)	Hardware Monitoring	Teletherapy Platforms	Audio-only App, (ex:Duolingo)
In-clinic therapy & remote monitoring	✓	✗	✗	✗	✗
High Accuracy	✓	✗	✓	✗	✓
Objective AI Analytics	✓	✗	✗	✗	✓
Data Type	Diverse	Qualitative observation	Tongue-palate contact	Audio / Video	Text / Audio
Low Cost	✓	✗	✗	Reasonable	✓
Reimbursement	✓	✓	Partial	✓	✗

ACCENLENT

An investment will support Accenlent to quickly implement its solution into healthcare system.
